Education

Computer Science and Design, B.S.
@Northeastern University, Khoury College of Computer Sciences

May 2027 graduation (expected) | Boston, MA | GPA: 3.6

Relevant courses: Web Development, AI, Human-Computer Interaction, Information Design, User-Experience Design, Information Presentation & Visualization, Typography, Graphic Design, Algorithms & Data, Object-Oriented Programming, Discrete Mathematics, Fundamentals of Computer Science 1 & 2

Experience

Marketing Analytics Co-op
@The Boston Beer Company

Jul - Dec 2025
Boston, MA

- Conducted a UX research stint to refine a system for delivering high-level metrics to marketing teams, producing a concise one-sheeter designed to drive action
- Transformed complex data into a filterable, interactive Power BI dashboard, eliminating the need to create any additional marketing study report PowerPoints
- Applied design thinking and UX principles to make marketing analytics team's work more digestible for a non-technical audience

Design Lead
@Sandbox

Jan 2025 - Present
Boston, MA

- Led design and product thinking, managing designers, tickets, and project timeline
- Restructured the site flow to improve navigation and information architecture
- Collaborated with developers and client to ensure high-quality implementation and alignment with client values while maintaining strong emphasis on user experience

UX Designer
@Radien

Jul - Aug 2024
Seattle, WA

- Created a cross-team ticket tracking system that addressed client's goals for improved workflow efficiency across teams
- Interviewed tech industry workers to identify pain points in work
- Spearheaded ideation for the project, managing and contributing to the generation of 20+ low-fidelity prototypes of potential solutions

Data Analyst
@Aspire Institute

May 2024
Remote

- Analyzed email data in Excel and created comprehensive data visualizations
- Provided strategies for improving customer retention and engagement, leveraging solutions proven effective for the target audience

Projects

Personal Portfolio Website (link)

Sep 2024 - Present

- Implemented high-fidelity Figma prototype of website in a single-page React web app with multiple unique project pages
- Utilized efficient coding practices like mapping and components to optimize performance and code maintainability
