Education

Computer Science and Design, B.S.
@Northeastern University, Khoury College of Computer Sciences

May 2027 graduation (expected) | Boston, MA | GPA: 3.6

Relevant courses: Web Development, AI (in-progress), Human-Computer Interaction, Information Design, User-Experience Design, Information Presentation & Visualization, Typography, Graphic Design, Algorithms & Data, Object-Oriented Programming, Discrete Mathematics, Fundamentals of Computer Science 1 & 2

Experience

Marketing Analytics Co-op
@The Boston Beer Company

Jul - Dec 2025
Boston, MA

- Conducted a UX research stint to refine a system for delivering quick, high-level quarterly metrics to brand teams, producing a concise email one-sheeter
- Eliminated the need to create any additional brand and sales lift study PowerPoints by consolidating data into a filter-able, interactive Power BI dashboard
- Instilled UX design principles into the marketing analytics team's work, helping release work that is more easily understandable for and usable by the brand teams

Design Lead
@Sandbox

Jan 2025 - Present
Boston, MA

- Led the design side of the project, managing designers, tickets, and project timeline
- Restructured the overall site flow to improve navigation and information architecture, while maintaining a high standard of user experience
- Collaborated cross-functionally with developers to ensure high-quality implementation and the Northeastern co-op office to align with the school's values

UX Designer
@Radien

Jul - Aug 2024
Seattle, WA

- Conducted interviews with tech-industry workers to identify pain points in their work, leading to the creation of a solution that advanced Radien's goals for improved workflow efficiency
- Led the ideation phase of the project, managing and contributing to the generation of 20+ low-fidelity prototypes of potential solutions

Data Analyst
@Aspire Institute

May 2024
Remote

- Analyzed email data in Excel and created comprehensive data visualizations
- Provided solutions on how to improve customer retention and engagement by leveraging various social media platforms

Projects

Personal Portfolio Website (link)

Sep 2024 - Present

- Designed a high-fidelity Figma prototype of website and implemented it in a single-page React application with multiple unique project pages
- Utilized efficient coding practices like mapping and components to optimize performance and code maintainability
