Relevant courses: Web Development, AI, Human-Computer Interaction, Information Design, User-Experience Design, Information Presentation & Visualization, Typography, Graphic Design, Algorithms & Data, Object-Oriented Programming, Discrete Mathematics, Fundamentals of Computer Science 1 & 2

Experience

Marketing Analytics Co-op @The Boston Beer Company

Jul - Dec 2025

Boston, MA

- Conducted a UX research stint to refine a system for delivering high-level metrics to marketing teams, producing a concise one-sheeter designed to drive action
- Transformed complex data into a filterable, interactive Power BI dashboard, eliminating the need to create any additional marketing study report PowerPoints
- Applied design thinking and UX principles to make analytics more digestible for a non-technical audience

Design Lead @Sandbox

Jan 2025 - Present

Boston, MA

- Led design and product thinking, managing designers, tickets, and project timeline
- Restructured site flow to improve navigation and information architecture
- Collaborated with developers and client to ensure high-quality implementation that aligns with client values, while maintaining strong emphasis user experience

UX Designer @Radien

Jul - Aug 2024

Seattle, WA

- Created a ticket tracking system that addressed client's goals for improved workflow efficiency across teams
- Interviewed tech industry workers to identify pain points in day-to-day work
- Spearheaded ideation for the project, managing and contributing to the generation of 20+ low-fidelity prototypes of potential solutions

Data Analyst @Aspire Institute

May 2024

Remote

- Analyzed email data in Excel and created a set of data visualizations to summarize effectiveness of current social media tactics
- Provided strategies for improving customer retention and engagement, leveraging proven marketing methods for the target audience

Projects

Personal Portfolio Website ([link](#))

Sep 2024 - Present

- Implemented high-fidelity Figma prototype of website in a single-page React web app with multiple unique project pages
- Utilized efficient coding practices like mapping and components to optimize performance and code maintainability
